SUMMARY

Business Intelligence and Data Analyst with experience transforming operational, sales, customer, and marketing data into executive-ready dashboards and actionable insights. Skilled in SQL, Power BI, Excel, Python, and KPI reporting, with hands-on experience building reporting systems, analyzing customer behaviour, tracking business performance, and supporting strategic decision-making. Strong background in both analytics and operations, allowing me to bridge technical analysis with business impact and stakeholder communication.

CORE SKILLS

💎 Data Analysis & BI

- SQL (Joins, CTEs, Aggregations, CASE WHEN, Filtering)
- Power BI (Dashboarding, Data Modeling, DAX, KPI Reporting)
- Excel (Pivot Tables, XLOOKUP, INDEX-MATCH, SUMIFS, Charts, Dashboards)
- Tableau
- Python (Pandas, Matplotlib, Data Cleaning, EDA)

💎 Analytics & Reporting

KPI Reporting, Dashboard Design, Data Modeling, DAX, Data Cleaning, Business Storytelling, Trend Analysis

💎 Business Analytics

Sales Analysis, Customer Analytics, Retention Analysis, Marketing Analytics, Operational Analytics

EXPERIENCE

Data and Operations Analyst

[Dylte Beauty and Wellness company](#)

📅 2024 - 2026

📍 Hybrid, Lagos

- Built and maintained Power BI dashboards to monitor sales, marketing, customer engagement, and operational performance metrics.
- Analyzed campaign performance and customer data to identify underperforming initiatives, contributing to a 40% increase in brand visibility through improved targeting strategies.
- Developed KPI reporting frameworks that improved visibility into business operations and enabled more data-driven decision-making.
- Identified workflow bottlenecks through operational data analysis, helping reduce executive response lag by 30%.
- Maintained structured datasets and reporting systems to support accurate performance tracking and executive reporting.
- Translated business activities into measurable metrics and actionable insights for leadership.

Executive Assistant

[Prazzle Arts Inc .](#)

📅 2023 - 2024

📍 Remote

- Built reporting workflows and tracking systems to improve operational visibility across daily business activities.
- Analyzed scheduling trends and operational data to identify productivity patterns and optimize coordination processes.
- Maintained structured records and communication logs to support reporting accuracy and business continuity.
- Developed task-tracking processes that improved follow-up consistency and operational efficiency.
- Supported internal reporting and performance monitoring for leadership decision-making.

Business Intelligence & Analytics Projects

Executive Business Review Dashboard

Tools: Excel, Pivot Tables, Pivot Charts, Power Query, KPI Reporting, Slicers, Timelines

- Designed a multi-page executive dashboard analyzing revenue, profit, customer performance, product profitability, regional trends, and operational metrics across a global retail dataset.
- Built interactive Year-over-Year KPI scorecards with dynamic filtering capabilities to support executive reporting.
- Developed commercial, customer, and operational analytics views to identify high-performing categories, underperforming products, and regional revenue drivers.
- Generated strategic business recommendations from dashboard insights to support leadership decision-making.

Customer Retention and Churn Analysis

Tools: Excel, MySQL, PowerBI, KPI Reporting, Slicers, Timelines

- Built a Customer Retention & Churn Analysis solution using Excel, MySQL, and Power BI, analyzing 2,576 customers and 6,543 orders to evaluate repeat purchase behavior, retention, churn risk, and revenue contribution;
- identified that repeat customers generated 81.04% of total revenue and developed an executive dashboard to support retention-focused business decisions

Dynamic Sales Performance Dashboard

Tools: Excel (Pivot Tables, Slicers, Timelines, Charts)

- Built an interactive sales dashboard to track 2023 sales performance by month, gender, product category, and age group.
- Designed KPI-driven visuals for monitoring trends, comparing segments, and identifying top-performing categories.
- Enabled stakeholders to interactively explore business performance and identify month-over-month patterns.

Sales & Marketing Performance Dashboard

Tools: Power BI, DAX

- Designed an interactive dashboard to evaluate sales trends, marketing performance, and campaign impact.
- Created KPI visuals and filters to highlight performance patterns, track growth, and support better business decisions.
- Used data storytelling principles to present insights in a way that is clear for non-technical stakeholders

Amazon Sales Exploratory Data Analysis

Tools: Python (Pandas, Matplotlib), Power BI

- Conducted exploratory data analysis on Amazon sales data to examine whether discounts drive long-term customer value or short-term purchases.
- Cleaned and analyzed data to identify trends, category performance, and patterns in discount-related behavior.
- Used visualizations to communicate findings and support data-backed pricing and promotional decisions.

Client Lifecycle CRM Pipeline Optimization

Tools: HubSpot CRM

- Managed a ₦42M fundraising pipeline using HubSpot CRM, structuring deal stages, contact tracking, and follow-up workflows.
- Built a more organized lead management process that improved visibility across the client lifecycle and supported timely engagement.
- Demonstrated strong understanding of CRM data structure, pipeline tracking, and operational analytics.

CERTIFICATION

Data Analysis Certification

EntryLevel (August 2023 - September 2023)

HNG Data Analytics Internship

HNG (March 2026)

EDUCATION

B.Sc. Biochemistry

Landmark University

09/2020 - 07/2024 Nigeria

GPA

4.52 / 5.0

INTERESTS
