PROFESSIONAL SUMMARY

Data & Business Intelligence Analyst with 2 years of formal analytics experience and more than 3 years of self-directed practice in SQL, Power BI and Python. Builds KPI dashboards and reports from sales, customer, marketing and operations data. Portfolio of nine projects spans business intelligence, data modeling, large-scale analytics and risk analysis. First Class B.Sc. in Biochemistry.

SKILLS

Analytics & Reporting: Data Analysis, KPI Reporting, Dashboard Development, Trend Analysis, Customer Analytics, Marketing Analytics, Data Modeling, Data Storytelling, Statistics, Market Research, Competitive Analysis, SEO Research

Technical: SQL (PostgreSQL, MySQL), Power BI, DAX, Power Query, Microsoft Excel, Python (pandas), Tableau, HubSpot CRM, Git & GitHub

Collaboration: Kanban board management, team coordination, strategic recommendations

PROFESSIONAL EXPERIENCE

Dylte Beauty & Wellness

2024–Present

Data & Operations Analyst | Remote (part-time), Lagos, Nigeria

- Analyze sales, customer, marketing and operations data with statistical methods to identify trends, performance gaps and improvement opportunities.
- Build and maintain Power BI dashboards and KPI reports that give leadership visibility into business and marketing performance.
- Develop recurring reporting that turns business activity into measurable KPIs and customer insights.
- Review operational workflows to identify bottlenecks and recommend process improvements.

HNG Internship

2026

Data Analytics Intern (Assistant Team Lead, FitCall.me project)

- Completed project-based analytics work in SQL, PostgreSQL, Power BI and data modeling, turning business questions into structured analytical tasks.
- Delivered projects on climate sentiment, e-commerce growth, global sales and banking data modeling, and served as Assistant Team Lead on a product-team market research project for a fitness app (see Selected Projects).

Otsuka Nutraceutical Nigeria Limited

2025–2026

Brand Communications Associate (NYSC) | Lagos, Nigeria

- Monitored brand activities and prepared weekly performance reports to track consumer engagement initiatives.
- Supported Pocari Sweat brand awareness activities and events.
- Contributed to planning and market development work to expand brand presence in relevant Nigerian consumer segments.

SELECTED PROJECTS

Climate Change Sentiment Intelligence

PostgreSQL · SQL · Power BI

- Analyzed 15.7 million climate-related tweets (2006–2019), keeping records with missing location data and flagging them instead of dropping them.
- Found that conversation volume peaked at about 6.25 million tweets in 2018 and believers accounted for 71.5% of volume. Published as a live Power BI dashboard.

Northwind Traders: Global Sales & Operations

Power BI · DAX · Data Modeling

- Analyzed sales, product, customer, employee and shipping data across 830 orders and \$1.27M in revenue (2013–2015).
- Found that discontinued products still accounted for 14.61% of revenue and higher discounts did not consistently lift revenue.

TradeZone: E-commerce Growth & Operations

SQL · PostgreSQL

- Cleaned and standardized customer, seller, order, payment, product and review data, then answered eight business questions on acquisition, fulfillment, revenue and spending.
- Found that more than half of new users did not transact within 30 days. Lagos had the highest conversion rate at 49.32%.

FitCall.me: Market Research & Product Opportunity Analysis

Product Analytics · Market Research

- Assistant Team Lead and data analyst on a cross-functional product team researching market demand and growth opportunities for FitCall.me, a personal trainer app connecting fitness clients with trainers. Supported team coordination and managed the project workflow through Kanban board task tracking.
- Researched search demand and keyword opportunities across the US and UK, evaluated competitors on pricing and scheduled live accountability, and helped define priority client and trainer segments. Findings: strong demand for “online fitness coach”, a projected \$295.10B global virtual fitness market by 2033, and no product pages ranking for “fitness accountability coach”.
- Worked on the failure conditions and pivot signals that would show the product's current approach was failing. Recommended long-form SEO content first, then high-intent paid landing pages and social awareness campaigns.

Executive Business Reporting Dashboard

Excel · Power Query · Pivot Tables

- Built an interactive executive dashboard for a fictional consumer-electronics retailer, covering revenue, profit, customers, products and operations.
- Found that the United States led revenue and Computers led category revenue, while Home Appliances were highly profitable without leading on revenue.

Customer Retention & Churn Analysis

SQL (MySQL) · Excel · Power BI

- Analyzed 2,576 customers and 6,543 orders to evaluate retention, churn risk, repeat purchasing and revenue contribution.
- Found that repeat customers generated 81.04% of total revenue. Built a Power BI dashboard with retention recommendations.

Palladium Bank: Retail Banking Data Warehouse

SQL · MySQL · Star Schema

- Designed a dimensional model for 18 months of banking transactions, with a transaction-grain fact table, seven dimensions and surrogate keys.
- Applied SCD Type 2 to preserve customer-tier history and SCD Type 1 for branch data.

Bitcoin Transaction Risk & Compliance Analysis

Python · Graph Analytics

- Built a transaction graph from the Elliptic dataset (203K+ transactions, 49 time steps) and combined network measures into a structural risk score.
- Flagged 11 same-step layering cases and 4 fan-out patterns in a 5,459-node subgraph. Scores indicate structural risk, not proof of criminal activity.

Sales & Marketing Performance Dashboard

Power BI · DAX

- Built an interactive dashboard on sales trends, marketing performance and campaign impact, with KPI visuals and filters designed for non-technical stakeholders.

Client Lifecycle CRM & Pipeline Optimization

HubSpot CRM

- Managed a NGN 42M fundraising pipeline, structuring deal stages, contact tracking and follow-up workflows.
- Improved visibility across the client lifecycle through structured CRM data and pipeline monitoring.
